About me

I am really curious and I love learning new things. I am really interested in social skills and communication and I like to teach how to do things that I like (for example Coding or Managing data). That is why I am a member of a community of practice where we share our passion for automation and analytics.

Interests

I want to work in a company which always faces new challenges, so that I will be able to grow professionally and personally. Besides, I would love to be part of a great team using new technologies to keep myself updated.

Experience

Full Stack Developer: Intive

Oct-2019 - Present

Customer: Nubi (Fintech)

Feb-2020 to Present

- Develop and maintain microservices and APIs with Flask
- Event processing with RabbitMQ
- Persistency with MongoDB and PostgreSQL
- Integration testing

Tools: *Flask, NodeJS, RabbitMQ, Mongo, Postgres* Methodology: *Agile, TDD*

Customer: Captec (Venture Capital)

Oct-2019 to Feb-2020

- Research customer needs in order to develop a solution together.
- Web development with Python (Django Framework)
- Deployment with Heroku

-Asynchronous jobs with Celery + Redis

-ETL with django ORM consuming external APIs.

Tools: *Python, Django, Celery, Heroku, Postgres, Redis* Methodology: *Agile*

ETL Developer: ExxonMobil

Aug-2018 - Oct 2019

Accomplishments:

- Made an ETL process that using API's centralizes data into a datalake.
- Speeded up data quality tasks from months to days by creating processes.
- Reduced the company Network support expenses by 12% by making a more accurate network inventory.
- Automated the Network Inventory process that used to be manual.
- Made a Python training to teach how to handle data with Pandas and Seaborn.

Tools: *Python, SQL Server, Power BI, GitLab, Visio.* Methodology: *Agile*

Contractor: Fravega

Dec-2017 - Jun-2019

Accomplishments:

- Reduced by 80% the number of issues related to config files, I achieved that by setting up automatic tests to check compliance before going to production.
- Automated reports, logs, backups, database updates and mailing.

Tools: *Python, Bash, Oracle SQL, MySQL, Javascript, PHP*

Education

Systems Engineering - Graduated

2014-2018

Universidad Tecnologica Nacional (UTN)

Courses

First Certificate Exam

2012

University of Cambridge

Data Science - Level: Advanced

2019

Universidad Austral
